7. suggested font regimes

1. font specimens

Every candidate font shown with pangram, weights, and character coverage.

MONONOKI CURRENT DEFAULT

The quick brown fox jumps over the lazy dog. 0123456789

Regular · **Bold** · *Italic* · ***Bold Italic***

I am finishing my PhD in neuroscience at the Max Planck Institute, working on how a tiny cluster of brainstem neurones uses dopamine to shape how animals remember. Graduating December 2026, and actively looking for data science roles in Europe.

Self-hosted · 4 weights · Latin + extended

JETBRAINS MONO

The quick brown fox jumps over the lazy dog. 0123456789

Regular · **Bold** · *Italic* · ***Bold Italic***

I am finishing my PhD in neuroscience at the Max Planck Institute, working on how a tiny cluster of brainstem neurones uses dopamine to shape how animals remember. Graduating December 2026, and actively looking for data science roles in Europe.

Google Fonts · Full weight range · Ligatures available · Slightly wider than Mononoki

IBM PLEX MONO

The quick brown fox jumps over the lazy dog. 0123456789

Regular · **Bold** · *Italic*

I am finishing my PhD in neuroscience at the Max Planck Institute, working on how a tiny cluster of brainstem neurones uses dopamine to shape how animals remember. Graduating December 2026, and actively looking for data science roles in Europe.

Google Fonts · IBM design system · Very clean for code and technical prose

MAJOR MONO DISPLAY DISPLAY ONLY

HAO THINGS :)

THOUGHTS · WRITING · SCIENCE · MUSIC · PHOTOS

THE QUICK BROWN FOX JUMPS OVER THE LAZY DOG. 0123456789

Google Fonts · Display weight only · Uppercase letterforms map to lowercase slots · Distinctive geometric style

MONOFETT DECORATIVE

HAO THINGS :)

THOUGHTS · WRITING · SCIENCE · MUSIC · PHOTOS

THE QUICK BROWN FOX JUMPS OVER THE LAZY DOG. 0123456789

Google Fonts · Single weight · Very heavy strokes · Best at large sizes for impact

LXGW WENKAI MONO TC CJK

The quick brown fox jumps over the lazy dog. 0123456789

Regular · Bold · Light

羅丁豪 · 《菌络万象》 · 后浪出版 · 澎湃新闻 · 环球科学 · 神经现实

I translated this book by Sheldrake into Chinese, which was published as《菌络万象》by HouLang Press in October 2024.

Google Fonts · Traditional Chinese · Monospaced · Calligraphic kai style · Beautiful CJK coverage

EB GARAMOND PROPORTIONAL · SERIF

The quick brown fox jumps over the lazy dog. 0123456789

Regular · **Bold** · *Italic* · ***Bold Italic***

For all my dissatisfaction with how Auster writes several of the female characters in *Moon Palace*, I still cannot resist the novel's startling literariness. This is one of those books where Auster's machinery of chance, drift, and sudden revelation finally acquires real grace.

Google Fonts · Classic Garamond revival · Excellent for literary text · Old-style figures

ATKINSON HYPERLEGIBLE PROPORTIONAL · SANS-SERIF

The quick brown fox jumps over the lazy dog. 0123456789

Regular · **Bold** · *Italic* · ***Bold Italic***

The locus coeruleus (LC) is a small brainstem nucleus that releases dopamine and noradrenaline across the brain. Classical accounts treat it as a slow, diffuse modulator — a volume knob on arousal. My project asks whether that picture is too coarse.

Google Fonts · Designed for maximum legibility · Distinct letterforms (Il1, 0O) · Braille Institute

FACULTY GLYPHIC PROPORTIONAL · GLYPHIC SERIF

The quick brown fox jumps over the lazy dog. 0123456789

Regular (single weight)

Specifically, I study how phasic LC dopamine release modulates functional subpopulations of CA1 hippocampal cells. The hypothesis is that these transient dopamine signals do something more structured than a global gain change.

Google Fonts · Glyphic/incised style · More architectural than Garamond · Good for dense informational text

3. body text — monospace

Long-form text from the thoughts page (Moon Palace review) in each monospace candidate. Set at the site's actual body size and line-height.

MONONOKI CURRENT

For all my dissatisfaction with how Auster writes several of the female characters in *Moon Palace* (especially Kitty Wu and Mrs Hume), I still cannot resist the novel's startling literariness. This is one of those books where Auster's machinery of chance, drift, and sudden revelation finally acquires real grace. The plot keeps turning almost by accident, as if the novel were discovering its own destiny in passing, and one keeps reading in a kind of daze, half for the story and half for the pleasure of how casually it is told.

What I love most is the way the book lets deprivation, wandering, and dependency exist without sinking into self-pity. Marco Fogg and his uncle's life together is precarious, but never miserable in the usual literary way.

JETBRAINS MONO

For all my dissatisfaction with how Auster writes several of the female characters in *Moon Palace* (especially Kitty Wu and Mrs Hume), I still cannot resist the novel's startling literariness. 4. body text — proportional

The same content in proportional fonts. These would be a stylistic departure from the current all-monospace approach — consider where they might work (e.g. thoughts reviews, writing page, lede text).

EB GARAMOND FOR LITERARY TEXT

For all my dissatisfaction with how Auster writes several of the female characters in *Moon Palace* (especially Kitty Wu and Mrs Hume), I still cannot resist the novel's startling literariness. This is one of those books where Auster's machinery of chance, drift, and sudden revelation finally acquires real grace. The plot keeps turning almost by accident, as if the novel were discovering its own destiny in passing, and one keeps reading in a kind of daze, half for the story and half for the pleasure of how casually it is told.

What I love most is the way the book lets deprivation, wandering, and dependency exist without sinking into self-pity. Marco Fogg and his uncle's life together is precarious, but never miserable in the usual literary way. The same goes for Fogg's homelessness in Central Park, which Auster writes with a strange blend of material exactness and metaphysical lightness.

Natural choice for literary reviews. The old-style figures and classical proportions give weight to criticism.

ATKINSON HYPERLEGIBLE FOR LONG-FORM CLARITY

For all my dissatisfaction with how Auster writes several of the female characters in *Moon Palace* (especially Kitty Wu and Mrs Hume), I still cannot resist the novel's startling literariness. This is one of those books where Auster's machinery of chance, drift, and sudden revelation finally acquires real grace. The plot keeps turning almost by accident, as if the novel were discovering its own destiny in passing, and one keeps reading in a kind of daze, half for the story and half for the pleasure of how casually it is told.

What I love most is the way the book lets deprivation, wandering, and dependency exist without sinking into self-pity. Marco Fogg and his uncle's life together is precarious, but never miserable in the usual literary way. The same goes for Fogg's homelessness in Central Park, which Auster writes with a strange blend of material exactness and metaphysical lightness.

Maximum readability for extended reading. Very distinct Il100 differentiation. Slightly clinical feel.

FACULTY GLYPHIC FOR DENSE TEXT

For all my dissatisfaction with how Auster writes several of the female characters in *Moon Palace* (especially Kitty Wu and Mrs Hume), I still cannot resist the novel's startling literariness. This is one of those books where Auster's machinery of chance, drift, and sudden revelation finally acquires real grace. The plot keeps turning almost by accident, as if the novel were discovering its own destiny in passing, and one keeps reading in a kind of daze, half for the story and half for the pleasure of how casually it is told.

What I love most is the way the book lets deprivation, wandering, and dependency exist without sinking into self-pity. Marco Fogg and his uncle's life together is precarious, but never miserable in the usual literary way. The same goes for Fogg's homelessness in Central Park, which Auster writes with a strange blend of material exactness and metaphysical lightness.

More architectural than Garamond. Incised serifs give a carved, inscriptional quality. Good density without losing clarity.

LEDE / SUBTITLE TEXT

These italic subtitles appear at the top of each subpage.

7. suggested font regimes

Complete font combination proposals shown as simplified page mockups. Each regime assigns fonts to: site title, page titles, navigation, body text, sidebar, CJK, and accent/display uses.

REGIME A: PURE MONONOKI (CURRENT)

Everything in Mononoki. The monospace-everywhere aesthetic. Clean, consistent, slightly austere.

hao things :)

thoughts writing science music photos

thoughts

Notes on things that refused to leave quietly.

phd project

The locus coeruleus (LC) is a small brainstem nucleus that releases dopamine and noradrenaline across the brain. Classical accounts treat it as a slow, diffuse modulator — a volume knob on arousal.

Dinghao Luo
羅 丁豪

phd in neuroscience / data science / science journalism

REGIME B: MONONOKI CHROME + JETBRAINS MONO BODY

Mononoki for branding (site title, nav, sidebar). JetBrains Mono for body text. Stays monospace but adds textural variety. LXGW WenKai for CJK.

hao things :)

thoughts writing science music photos

thoughts

Notes on things that refused to leave quietly.

phd project

The locus coeruleus (LC) is a small brainstem nucleus that releases dopamine and noradrenaline across the brain. Classical accounts treat it as a slow, diffuse modulator — a volume knob on arousal.

Dinghao Luo
羅 丁豪
phd in neuroscience / data science / science journalism

REGIME C: MONO CHROME + GARAMOND FOR LITERARY CONTENT

Mononoki for nav, sidebar, and UI. EB Garamond for body text on thoughts and writing pages. IBM Plex Mono for science page. Major Mono Display for site title. LXGW WenKai for CJK. The most typographically rich option.

HAO THINGS :)

thoughts writing science music photos

thoughts

Notes on things that refused to leave quietly.

moon palace

For all my dissatisfaction with how Auster writes several of the female characters in *Moon Palace*, I still cannot resist the novel's startling literariness. This is one of those books where Auster's machinery of chance, drift, and sudden revelation finally acquires real grace.

Dinghao Luo
羅 丁豪
phd in neuroscience / data science / science journalism

REGIME D: MONO CHROME + ATKINSON HYPERLEGIBLE BODY

Mononoki for branding, JetBrains for headings. Atkinson Hyperlegible for all body text. Maximum readability, modern-clinical feel. LXGW WenKai for CJK.

hao things :)

thoughts writing science music photos

thoughts

Notes on things that refused to leave quietly.

phd project

The locus coeruleus (LC) is a small brainstem nucleus that releases dopamine and noradrenaline across the brain. Classical accounts treat it as a slow, diffuse modulator — a volume knob on arousal. My project asks whether that picture is too coarse.

Dinghao Luo
羅 丁豪
phd in neuroscience / data science / science journalism

REGIME E: FACULTY GLYPHIC BODY + IBM PLEX MONO CHROME

IBM Plex Mono for nav, sidebar, UI, and headings. Faculty Glyphic for all body text. Architectural, precise, slightly institutional. LXGW WenKai for CJK.

hao things :)

thoughts writing science music photos

thoughts

Notes on things that refused to leave quietly.

phd project

The locus coeruleus (LC) is a small brainstem nucleus that releases dopamine and noradrenaline across the brain. Classical accounts treat it as a slow, diffuse modulator — a volume knob on arousal. My project asks whether that picture is too coarse.

Dinghao Luo
羅 丁豪
phd in neuroscience / data science / science journalism

REGIME F: SELECTIVE HYBRID (MY RECOMMENDATION)

Mononoki for nav, sidebar, UI, and most body text (preserves the monospace identity). EB Garamond *only* for thoughts review text and writing page prose. Major Mono Display for site title only. LXGW WenKai Mono TC for all CJK. Minimal change, maximum impact where it matters.

HAO THINGS :)

thoughts writing science music photos

thoughts

Notes on things that refused to leave quietly.

moon palace

For all my dissatisfaction with how Auster writes several of the female characters in *Moon Palace*, I still cannot resist the novel's startling literariness. This is one of those books where Auster's machinery of chance, drift, and sudden revelation finally acquires real grace. The plot keeps turning almost by accident, as if the novel were discovering its own destiny in passing.

Same regime on the science page:

phd project

The locus coeruleus (LC) is a small brainstem nucleus that releases dopamine and noradrenaline across the brain. Classical accounts treat it as a slow, diffuse modulator — a volume knob on arousal.

Same regime on the writing page (mixed English/Chinese):

translation
